SUBHASHREE G

FRONTEND DEVELOPER

Chennai | subhashreegovindaraju@gmail.com | 9042443872 | linkedin | github | Behance

Professional Summary

Frontend Developer with **7 months of experience** building responsive web applications using **React.js, JavaScript, HTML, and CSS**. Experienced in developing reusable UI components, integrating **RESTful APIs**, and supporting **MERN stack applications**. Skilled in creating responsive interfaces using **Tailwind CSS** and modern frontend development practices while ensuring performance optimization and cross-browser compatibility.

Technical Skills

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Responsive Design
Backend: Node.js, Express.js, RESTful APIs
Database: MongoDB (Basic), SQL (Basic)
Version Control & Tools: Git, GitHub, VS Code, Postman
Full Stack: MERN Stack

Work Experience

Associate Frontend Developer

Cloute Technologies Pvt. Ltd., Chennai
Jan 2024 – July 2024

- Developed responsive and scalable **UI components using React.js, JavaScript (ES6+), and Tailwind CSS** for **HRMS** and **NGO** web applications.
- Designed and implemented **modular component-based architecture** in React to improve maintainability and code reusability across multiple application modules.
- Converted **UI/UX wireframes and design mockups into fully functional web interfaces**, ensuring pixel-perfect layout alignment and consistency.
- Implemented **state management using React hooks such as useState, useEffect, and useContext** to handle component lifecycle and dynamic data rendering.
- Integrated **RESTful APIs** to fetch, display, and update dynamic data within dashboard components.
- Developed **responsive layouts using CSS Flexbox, Grid, and Tailwind utility classes**, ensuring seamless functionality across desktop, tablet, and mobile devices.
- Improved application performance by **optimizing component rendering, reducing unnecessary re-renders, and organizing reusable UI components**.
- Implemented **form validation and input handling** to ensure accurate data entry and improved user experience.
- Conducted **cross-browser testing** to ensure consistent behavior across Chrome, Edge, and Firefox browsers.
- Used **Git and GitHub for version control**, managing branches, commits, and pull requests in collaborative development environments.
- Participated in **Agile development processes**, including sprint planning, task tracking, and regular code reviews with the development team.
- Collaborated closely with **backend developers and UI designers** to integrate APIs and implement new features efficiently.
- Identified and resolved **UI bugs and performance issues** during testing and deployment stages.

Education

Master of Computer Applications (MCA) - Bharathiar University - 2024
Bachelor of Science in Information Technology (B.Sc IT) - Bharathiar University - 2021

Projects

APD India NGO Website – Contribution Module

- In this the **donation contribution module using React.js and Tailwind CSS** that allows users to submit donation details and contributor information through an easy online form.
- The module collects **donor details such as name, contact information, and donation amount**, helping the NGO maintain and manage contributor records in an organized way.
- **RESTful API communication** between the frontend and backend enables donation data to be sent, stored in the database, and retrieved when required.
- A **donor management dashboard** displays contributor information in a structured table format, allowing administrators to monitor and manage donation records.
- **Search and filtering functionality** helps administrators quickly locate specific donor details and review contribution history.
- A **responsive user interface** ensures the donation system works smoothly across desktop, tablet, and mobile devices.
- **Reusable React components and clean UI structure** improve consistency, maintainability, and user experience for both donors and administrators.

HRMS Dashboard

- An **HRMS (Human Resource Management System) dashboard using React.js** that helps organizations manage employee information such as profiles, departments, roles, and designations in one centralized interface.
- **Employee listing and profile sections** display details including employee name, department, designation, and contact information for HR teams.
- **Search, filtering, and sorting features** allow HR staff to quickly locate and manage employee records based on different criteria.
- **REST API communication** retrieves employee data from the backend and displays it dynamically within dashboard components.
- **Structured tables, forms, and profile views** organize employee information clearly, making data easy to read and manage.
- A **responsive dashboard layout** ensures smooth accessibility across desktop, tablet, and mobile devices.
- **Reusable UI components and structured component hierarchy** support better code organization and long-term maintainability.

Personal Projects

Zomato Website Clone (MERN Stack)

- This **food delivery web application using the MERN stack (MongoDB, Express.js, React.js, Node.js)** that allows users to browse restaurants, view menus, and place orders.
- **Restaurant listings and menu pages** display available restaurants and food items so users can easily explore and select meals.
- **RESTful API communication** between frontend and backend manages restaurant data, menu items, and order information.
- **MongoDB database structure** stores restaurant details, user information, and order records.
- **Dynamic React components and responsive UI** provide a smooth browsing and ordering experience across devices.

Library Management System

- It's a **web-based library management application using HTML, CSS, and JavaScript** for managing book records digitally.
- **CRUD operations** allow adding, searching, updating, and deleting book information such as title, author, and availability.
- **Interactive forms and tables** display book details in an organized structure.
- **JavaScript DOM manipulation** updates records dynamically based on user actions.
- **Responsive interface and form validation** improve usability and ensure accurate data entry.

Certificates and Achievements

Master in UI/UX Design - Adoro Institute of Multimedia

MERN Stack - Besant Technologies
